The NER HELPTech equipment ownership database

HELPtech℠

Heavy Equipment Loss Prevention Technology

The theft of construction and farm equipment is an ongoing and costly problem for equipment owners.
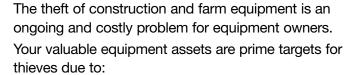

Your valuable equipment assets are prime targets for thieves due to:

- the complex nature of uniquely identifying machines
- the challenges that law enforcement face in obtaining accurate ownership information quickly
- the relative ease with which stolen equipment can be sold in the used market
- the lack of security on job sites

Since 2001 NER has supported law enforcement's equipment investigations and provided information that has assisted in the recovery of 35 million dollars worth of stolen equipment. By registering your equipment on the NER HELPtech (Heavy Equipment Loss Prevention Technology) ownership database, you make it possible for us to identify you as your equipment's true owner at any time – even before you discover that your equipment is missing.

Registering your equipment on the HELPTech database can help

BEFORE YOU HAVE A THEFT, NER PROVIDES:

- Theft prevention suggestions and techniques
- Regional heavy equipment theft summits
- HELPtech decals, which should be affixed to registered equipment
- Information about regional theft trends through NER's newsletters and alerts
- Assistance with compliance registration programs

AFTER YOU HAVE A THEFT, NER OFFERS:

- Assistance when you report thefts to the NER database
- Support from NER's analysts, who will review the theft report for accuracy and alert you if any discrepancies are found
- Theft alerts, which are sent to thousands of regional law enforcement contacts notifying them of the recent theft
- 24-hour support to help identify your machine if found

Additional NER HELPtech Membership Benefits
